Domintell

## SMOOTH

- Direct Bluetooth connection** → wireless
- In-app settings** → once plugged, you don't ever have to touch the module again
- Combine the 3 devices** → create your favorite atmospheres or a smooth wake-up
- Other functions integrated** → immediate or progressive alarm clock, presence simulation, timer, total time of usage (for replacement or cost estimation), etc
- Rename your devices** → through the app
- Fits** → in most wiring boxes

## SAFE

- Secured connection** → connection locked through the physical button
- Administration** → A single admin with up to 7 parallel users
- Encryption** → 100% encrypted transmissions

## MODULAR

- Remote updates** → updated through the app
- Adaptive** → in-app mode switching when changing the light bulb
- Upgradeable** → free new features to come
- Future proof** → future LED lamps ready

# Dmax your favorite suite of Bluetooth® controllers

## Dimmax

- 230V Bluetooth® universal silent dimmer
- For LED and filament LED lighting systems up to 200W, and also for classical light bulbs and halogens up to 420W
- Several optimized dimming modes for different light bulbs/loads
- 4 protection systems against overload, short circuits and overheating
- Smooth dimming → choice among several dimming curves
- Last dimming point can be memorized (memo function)
- Low standby consumption

## Remax

- Relay operator for switching loads up to 8A
  - control most of your devices at home
- Extend your wireless lighting system to your self standing luminaires and communicate through the app from your smartphone → control all your favorite I/O devices
- Open electrified gates and garage doors from the app
- No more lost/broken remotes
- Easy setup through the App

COMING SOON
