

Are you in search of time and cost saving solutions? The Preflex concept is the answer.

The Preflex concept was developed by an electrical installer who came up with a faster, safer and easier way of installing. Today, over 750.000 km of Preflex conduits have found their way into homes and businesses across Europe. Meanwhile, our mission is still the same: providing solutions that make your life easier and make professional installations safer.

Only Quality components

Preflex conduits...

...are made from high-grade, halogen free, low smoke polypropylene (750N)

- Preflex conduits are flame retardant, self-extinguishing and halogen free-low smoke.

That makes a huge difference in terms of fire safety of electrical installations and buildings as a whole.

...Have just the right amount of flexibility and rigidity to ensure smooth handling and easy anchoring.

...Have an excellent impact resistance, shape retention and won't crack, which allows you to

- add or remove wires
- work at low temperatures

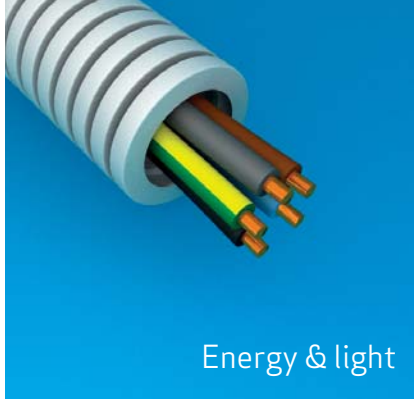

...Are always provided with wires & cables of the highest, certified quality

Any installation you can think of

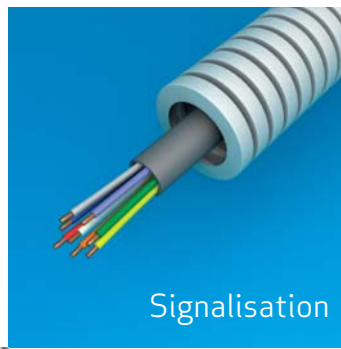

We put great emphasis on quality, both in the materials we use and in the production process.

That means our conduits have excellent mechanical properties and a super-smooth finish which makes them suitable for all installations, such as:

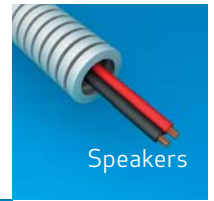

- renovation, new housing developments, belt construction, timber framed houses
- installations in concrete, hollow walls and false ceilings

Energy & light

Signalisation

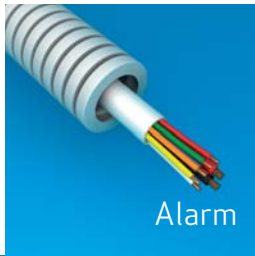

Speakers

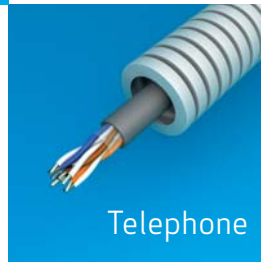

Data-coax combinations

Coax

Alarm

Telephone

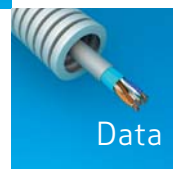

Fireproof

Data

KNX/EIB

Data

Empty conduits with or without draw wire

Any cable you can think of

With a cable range as extensive as ours, you'll have a hard time coming up with a prewired combination that we can't provide. We have a full range of solutions for every application, from lighting and energy to domotics, data networks and much more.

Preflex conduits comply with all European directives in regard to

- General requirements for pliable conduit systems : EN 61386-01 – EN 61386-22
- Halogen free and low smoke cable systems : IEC 61034 – IEC 60754-1 – 60754-2

Need a hand?

The Preflex® unwinder is the perfect installation help.

- Stable
- Durable
- Water resistant
